PROFILE

As a cybersecurity student with a strong foundation in networking and security tools and hands-on practical knowledge. Seeking an internship to gain research-oriented practical exposure, enhance technical skills, and contribute to the organization's objectives.

ACADEMIA

- B.E Computer Science and Engineering (Cyber Security) – Dr. N.G.P Institute of Technology — 2023 - 2027
  CGPA: 8.18 (till 6th semester)
- HSC – Kongu Vellalar Matriculation Higher Secondary School with 81.5% — 2022 - 2023

PROJECTS

- **REAL - TIME EVIDENCE PRESERVATION**

  Developed a Java-based real-time evidence monitoring system using SHA-256 hashing for integrity verification with tamper detection, persistent storage, and automated logging.

- **VERICHAIN – CRYPTOGRAPHIC NEWS / DOMAIN VERIFICATION SYSTEM**

  Developing a web-based misinformation verification system that validates news URLs usingsource credibility checks, trust score visualization, and community-based upvote/downvote mechanisms without using AI/ML.

- **DNS ENUMERATION TOOL**

  A basic python tool that retrieves DNS records (A, MX, NS, TXT) to help detect misconfigurations and identify potential vulnerabilities in a network's domain setup.

INTERNSHIP

- **SOC L1 Analyst Intern - i6 Security Solutions Pvt. Ltd. (Present)**
  - Performed initial analysis of endpoint, network, and email security alerts.
  - Monitored Endpoint Detection and Response (EDR) alerts using CrowdStrike Falcon.
  - Monitored security events and alerts using SIEM platforms.
  - Documented findings and escalated critical or suspicious incidents as required.
  - Gained hands-on experience in SOC operations, alert monitoring, and incident response workflows.
- **Ethical Hacking Intern - HackupTechnology Pvt Ltd (June 2025)**
  - Practiced networking fundamentals and network security concepts.
  - Analyzed network traffic and basic security events.
  - Worked on ethical hacking and vulnerability assessment concepts.
  - Performed hands-on security labs using common security tools.

TECHNICAL SKILLS

- Programming Language: Python, Java, C.
- Operating Systems: Windows, Linux(Ubuntu/Kali Linux).
- Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, FTP, SSH, VPN, Routing & Switching Fundamentals.
- Cyber Security: SOC, SIEM, EDR, VAPT.
- Security Tools: CrowdStrike Falcon, Burp Suite, Wireshark, Nmap, Metasploit, Autopsy, OWASP ZAP, Nessus(Basic).
- Monitoring: Zabbix, Prometheus, Grafana.
- Web Technologies: REST APIs, JSON, Node.js.

CERTIFICATIONS

- NPTEL - Practical Cyber Security for Cyber Security Practitioners
- NPTEL - Privacy & Security in Online Social Media
- NPTEL - Introduction to Industry 4.0 and Industrial Internet of Things
- Infoziant - Full Stack Cybersecurity Practitioner Program

SOFT SKILLS

- Analytical Thinking
- Problem Solving
- Communication
- Team Collaboration
- Time Management

PARTICIPATIONS

- Adobe Hackathon - Participant
- ICT Academy Youth Leadership Summit 2024 - Participant

PAPER PRESENTATION / SEMINAR / INDUSTRIAL VISIT

- Paper Presentation on “AI-Driven BCI Smart Home with Cyber Security” at Bannari Amman Institute of Technology in 2025.
- **IEEE Conference Paper Presentation (ICECA 2025) - Online**
  Presented an IoT-based research paper on connected ambulance systems for real-time emergency response.
- National Level Seminar - “Tackling the Vulnerabilities: Challenges in Vehicle Intrusion Detection Systems”
- Industrial Visit to Soften Technologies at Cochin, Kerala in 2025

EXTRA CURRICULAR ACTIVITIES

- CHAIR - Open Source Club
- EXECUTIVE MEMBER - Cyber Nexus Association

LANGUAGES KNOWN

- English
- Tamil
